

Disposable nitrile gloves BoSafety powder-free

BoSafety powder-free disposable gloves made of nitrile and of high-quality. Does not cause allergic reactions and is gentle on the hand. It has good elasticity and comfort when wearing them. Suitable for use in the food industry and medicine.

Advantages:

Synthetic nitrile rubber provides better protection against tears and wear.

The gloves are flexible, so you won't feel any discomfort. Perfectly adapts to the shape of the hand.

It does not contain latex, so it does not cause allergies and it is suitable for sensitive skin.

These gloves do not dry out the skin because they are made without powder.

Thanks to the thin walls and textured fingertips, there is excellent finger sensitivity and grip on the touch surface.

Effective protection against chemicals.

Resistant to oil products, grease, moisture.

A very versatile glove suitable for many activities.

Suitable for contact with food, tested and certified according to EU regulation 10/2011.

Without phthalates and other softeners.

Especially durable.

Thanks to the nitrile used in the gloves, sensitivity to protein allergies is reduced to the maximum.

Packaging: S, M, L, XL 100 pcs. in the glove box.

It has a CE mark (EU 2016/425), meets standards EN 420:2003+A1:2009, EN 374, EN 455.
