

## Trousers TENSION PLUS (4-WAY STRETCH) (Hi-Vis Yellow/Black)

This model is exceptional due to its „**4-Way Stretch**“ fabric, meaning that the trousers are ultra-stretchy and do not limit any movements. Dobby weave fabric is extremely flexible and breathable, ensuring excellent air circulation (water vapor resistance: Ret = 2.8). Two segmented reflective tapes that do not limit movement are placed on the backside of the trousers near the bottom hem. Two additional top holster pockets on the front ensure a convenient way to store work tools. Large convenient pockets on the sides will give extra space while straps on the right side of the trousers are perfect for holding any additional tools that might otherwise limit movement. Tension Plus has CORDURA®-reinforced knee pads ensuring better resistance to wear, tear and friction. CORDURA® fabric also extends the lifespan of Tension Plus trousers. Additional knee pads may be placed from the inside. The double fold hem ensures easy adjustment of the length of the trousers for tall people, giving an extra 4 cm after unpicking of the seam.
