

Warm winter jacket SPACE (Black)

Warm and modern-looking SPACE winter jacket of contemporary design

The TPU membrane makes this winter jacket water-proof and ensures excellent air circulation. The hood can be detached and adjusted. Space winter jacket is made of Ripstop fabric which is resistant to tearing and ripping due to durable reinforced yarns inserted in regular intervals and forming a mesh. The jacket has a zipper with a windproof flap in the front. Stretchy cuffs ensure warmth. For your convenience, the jacket has three spacious zip pockets in the front and chest area, one of which is a flap pocket.
